## STORMWATER COMMITTEE MEETING

February 28, 2019

The meeting was called to order at 6:30 p.m. Present were Committee members Bob Rapak, Sue Yenchko and Kasha Griva, Chair. Also present were Councilmember Joe Garguilo, Council President Gale Gallo, Mayor David G. Beasley, Borough Engineer Mike Knouse, Borough Manager Cindy Foster, and Maintenance Department Superintendent Cliff Karlsen.

Ms. Griva made opening remarks and then turned the floor over to Mr. Knouse for a Borough-wide presentation geared toward single-family residential properties in the Borough relative to a proposed stormwater assessment fee. Following the presentation the audience posed questions about billing methods and legal mechanisms for non-payment, requirements under the Borough's current permit, priorities and projects to be accomplished within that timeframe, the need to monitor the program and establish credits for best management practices, the importance of tracking fees received in a separate fund dedicated to stormwater management, and methods to monitor the water discharge quality in the Borough.

Being no further discussion the meeting unanimously adjourned at 8:26 p.m.
